We would like to thank the land owner for the use of the land, all the members who helped set out the trial and all who c

	Instructions			
1	Sort the entry forms in to order and separate the envelopes			
2	go through the observer sheets and add up the totals for those that have not been done			
3	Copy the master spreadsheet and save as the trial name and date - just a suggestion.			
4	I then enter the names and the other details from the entry list on to the working tab.			
5	starting with section 1, enter the total scores for each rider			
6	Save the information after each section is entered, just in case something happens to the computer and loses all of you information.			
7	Do this for each section			
8	once you have entered all of the sections, save the spreadsheet.			
9	if you press the sort riders button, it should sort by class and then total			
10	if the sort does not work correctly, do not save, close the spreadsheet and reload the file. This is why I suggested saving it before pressing the sort riders button			
11	Check the information looks ok and that no typos have occurred. Correct any mistakes.			
12	check for riders with the same score. If you find some you need to check the observer sheets and count the number of clean. If still tied, do it for 1's, etc until you have a rider with more instances of that score.			
13	Again save the spreadsheet.			
14	I would now copy each class on to the Results tab.			
15	Start with the experts, highlight columns A to Q for them and do Edit - Copy			
16	Go to the Results tab and the first clear space in column A click your mouse.			
17	Select Edit - Paste Special - Click Values and press ok. This will only copy the data NOT the format			
18	Back to the working tab choose Format - Style - Pattern and click a colour and click ok. This shows me which riders I have then copied on to the results sheet.			
19	Do this for the other classes. I normally place a clear row between each class just to separate them but decrease the row height a little			
20	Put any thank you's and any other info you need. And update the trial details and permit number on the top.			
21	Save the Spreadsheet			
22	Select all of the info from the results sheet and do Edit - Copy.			
23	Go to the web page tab, and click on cell A4.			
24	Select Edit - Paste Special - Click Values and press ok. This will only copy the data NOT the format			
25	This will then make ready the information for the web page.			
	Notes			
1	I have protected the working sheet so that the formula for the totals does not get deleted			
2	if you need to unprotect it, choose Tools - Protection - Unprotect Sheet
